

ARMAN DAS

Backend Developer | Software Developer | AI/ML Enthusiast
work.armandas@gmail.com | +91 8745951248 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building full-stack and backend systems using Python, Django, FastAPI, Flask, and Flutter. Developed multiple real-world projects spanning fintech, e-commerce, AI security, and IoT device management. Passionate about clean backend architecture, AI/ML integration, and building developer tools.

EXPERIENCE

Backend Developer Intern | Fusion Hive

April, 2025 – June, 2025

- Contributed to backend development tasks using Python-based frameworks in a professional team environment.
- Collaborated with senior developers to design and implement RESTful APIs and database models.
- Gained hands-on exposure to production-level code review, version control workflows, and agile practices.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Dart, Go (learning)
Frameworks: Django, FastAPI, Flask, Flutter, React
Databases: MySQL, SQLite3, MongoDB (No-SQL)
Embedded / IoT: Raspberry Pi, Arduino
Tools & Platforms: Git, GitHub, tmux, Linux (Bash), REST APIs,JWT Auth, Razorpay / Stripe

PROJECTS

CFC – Canteen Fast Card *Flask · SQLite3 · OpenCV · Raspberry Pi · HTML/CSS/JS*

- Designed a cashless payment system for colleges/schools using student ID cards (RFID & barcode).
- Accumulated bills on the student portal, payable at fee submission time; also supports card recharge.
- Integrated GPIO & Raspberry Pi for hardware-level RFID scanning and OpenCV for barcode reading.

POBucket – Student Marketplace *Django · MySQL · Razorpay / Stripe · HTML/CSS/JS*

- Built a P2P marketplace platform for students to list and sell hardware/software projects.
- Integrated Razorpay/Stripe payment gateway for secure transactions between student buyers and sellers.
- Implemented Django ORM models and MySQL backend with user authentication and listing management.

N.I.X – Universal Device Control Network *FastAPI · MySQL · Flutter · Dart · JWT · QR Code · HTML/CSS/JS*

- Designed a distributed brain-network system to control phones, PCs, and embedded devices from one account.
- Built a strict permission system and device linking via QR codes and manual setup using FastAPI.
- Cross-platform app developed in Flutter/Dart; backend secured with JWT authentication.

DB Reader – GUI Database Reading Tool *Flask · SQLite3 · HTML/CSS/JS*

- Created a browser-based interface for developers to visualize and perform CRUD on local .db / .sqlite files.
- Reduces friction during the development phase by eliminating the need for CLI database tools.
